CFP: EuroSys 2008 – Glasgow, 2nd - 4th April, 2008

EuroSys 2008, the European Conference on Computer Systems, seeks papers on all aspects of Computer Systems, especially ones crossing traditional divides and addressing:

- All areas of operating systems and distributed systems
- Systems aspects of:
    - Continuous media
    - Databases
    - Dependable computing
    - Distributed algorithms
    - Local and distributed storage
    - Management, measurement, monitoring
    - Mobile and pervasive computing
    - Novel uses of information technology
    - Novel user interfaces
    - Parallel and concurrent computing
    - Programming language support
    - Real-time and embedded computing
    - Security
    - Sensor nets and tiny devices
- Experience with existing systems
- Reproduction or refutation of previous results
- Negative results
- Early ideas

EuroSys'08 welcomes submissions and attendance from all over the world. Papers may report on: (1) The design, implementation, evaluation and deployment of such systems. (2) New ideas: papers nominated as "idea" papers will be held to less stringent standards of system evaluation. (3) Experiences: for papers in this category evaluation is paramount, and novelty less important. Authors may designate their paper as one of the above, but need not.

To encourage diversity, any single author may submit at most two papers. Papers authored by program committee members are held to a significantly higher standard, and their number in the final programme is severely restricted. Since reviewing is not double blind, authors should include their affiliation information and full, non-anonymized references.

Papers are reviewed by the programme committee, with the help of outside referees. Papers will be accepted primarily for their impact on the Systems community, and for bridging gaps between different communities. Novelty, clarity of explanation and thorough evaluation are additional criteria. Acceptance may be provisional, subject to further shepherding by a member of the program committee before final acceptance.

Papers may not exceed 14 pages double column, including figures and tables, and should use a 10pt font; a latex style file is available from http://www.dcs.gla.ac.uk/Conferences/EuroSys2008/submissions.cfm. No changes to margins, spacing, or font sizes are allowed from those specified by the style file. Papers that violate the submission guidelines will be automatically rejected without consideration of their merit.

Simultaneous submission of the same work to multiple venues, submission of previously published work, and plagiarism constitute dishonesty and fraud. Authors uncertain whether their submission meets ACM guidelines should contact the program chair.

Important Dates:

- Registration of Abstracts: Friday 14th September 2007 (23:59GMT)
- Submission Deadline (hard):   Friday 21st September 2007 (23:59 GMT)
- Notification to Authors: Thursday 20th December 2007
- Camera-Ready Deadline: Monday 4th February 2008 (23:59 GMT)

General Chair: Joe Sventek (University of Glasgow)
PC Chair: Steven Hand (University of Cambridge)
Programme Committee:

Gustavo Alonso, ETH Zurich	Urs Hölzle, Google
Paul Barham, Microsoft Research Cambridge	Galen Hunt, Microsoft Research Redmond
Herbert Bos, Vrije University	Terence Kelly, HP Labs
Peter Dickman, University of Glasgow	Anne-Marie Kermarrec, INRIA
Anja Feldmann, Deutsche Telekom Laboratories	Petros Maniatis, Intel Research Berkeley
Rachid Guerraoui, EPFL	Luigi Rizzo, University of Pisa
Hermann Härtig, TU Dresden	Wolfgang Schröder-Preikschat, University of Erlangen
Steven Hand, University of Cambridge	Emin Gün Sirer, Cornell
Gernot Heiser, UNSW/NICTA	Leendert Van Doorn, AMD
