

PRACTICAL SEMANTIC ASTRONOMY 2009

GLASGOW, UK. 2-5 MARCH

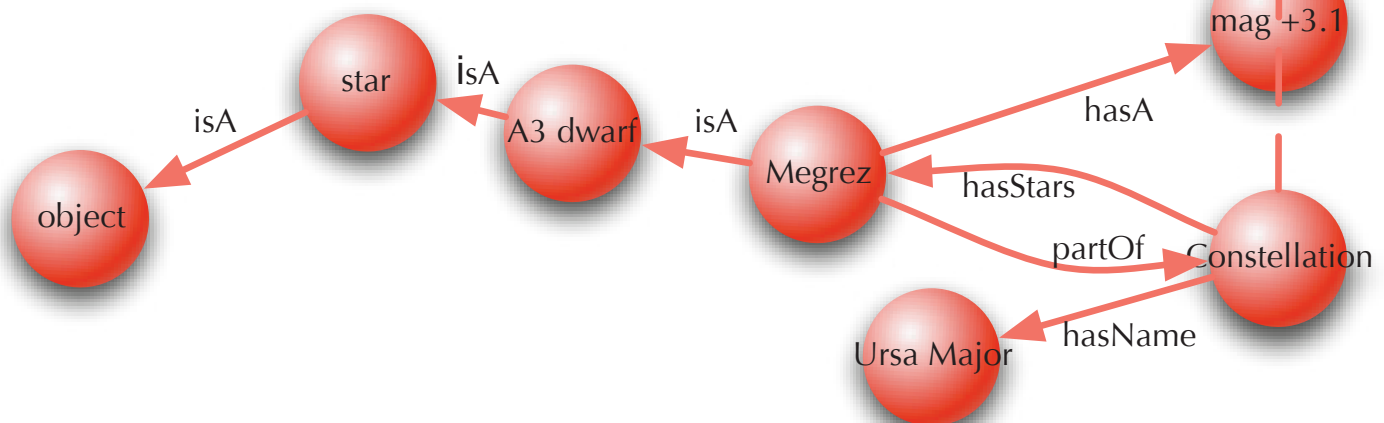

The second **Practical Semantic Astronomy Workshop** will bring together experts from a broad range of disciplines using semantic technologies, alongside practitioners experimenting with these techniques, to address current problems in astroinformatics.

Topics:

- ☉ Astronomy and solar ontologies;
- ☉ Knowledgebases;
- ☉ Metadata for astronomical databases;
- ☉ Semantic integration;
- ☉ Semantic queries and data mining;
- ☉ Semantic technologies.

Call for papers deadline: 4th January 2009

Early registration deadline: 31st January 2009

Scientific Organising Committee

Kirk Borne (GMU, USA)

Matthew Graham (Caltech, USA)

Doug Burke (CfA, USA)

Norman Gray (Leicester/Glasgow, UK)

Sébastien Derriere (CDS, France) Bob Mann (ROE, UK)
