Abstract

My abstract goes in here.

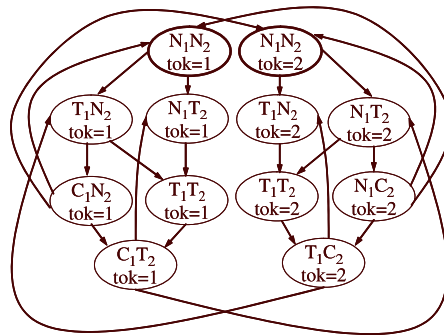

Figure 1: Kripke structure for 2 process mutual exclusion

1 Introduction

My introduction in here. I can refer to papers in my bibliography, as follows. A graph, see [1] is obtained from the processes in the system together with the communication channels between them.

2 Example Sections

Will have several sections like this. May even want to refer to other sections like Section 1. I can include a figure like so: the structure is given in Figure 1.

I might even want to use subsections:

2.1 Taking a closer look

And we can use subsubsections too:

2.1.1 Can I give this a name?

Well, it looks like it. But this title doesn't appear in the contents you notice.

3 Conclusions

I will detail my conclusions here

4 Future work

I will describe how my work could be extended in here.
